CASE MODELS IN HEALTHCARE BUSINESS

[A Practical Compendium for Physician Executives and Healthcare Administrators]

Dear Colleague

Imagine you're practicing confidently in your medical office, waiting for the next patient, when “sudden administrative panic” hits.

- How do you increase revenues, decrease costs and increase profits?
- How do you negotiate your next managed care contract thru CVPA?
- How would you deal with office workplace violence; a PA, IT, OSHA or HIPAA breach?
- How can you operationally speed up your ARs and reduce your APs?
- Did you ever wish you could manage your practice more efficiently, with less drama?

With this new CD, you'll learn about real-world practice situations and develop personalized solutions. These techniques are so powerful that many business schools use them. Typically, we present 25 cases reflecting a sample practice's patients, markets, competition, financial structure, service volumes, management, employees and other factors. The length of a case study may range from a few pages - to 30 or more. And, our case models are suitable for medical practices, clinics, hospitals and emerging healthcare entities. Our diverse range of topics, include:

- Market Competition
- Operations Management
- Capital Formation
- Cash Flow Management
- Revenue Analysis
- Hybrid Costing
- OSHA Model
- Economic Order Quantity Costing
- USA Patriot Act
- Mixed Costing
- Managerial Accounting
- Cost Volume Profit Analysis
- Incurred but Not Reported Claims
- Accounts Receivable
- Cost Accounting
- Medical Contract Negotiations
- Workplace Violence
- HIPAA
- Sarbanes-Oxley Act
- Medicare Compliance
- Health Information Technology
- IRS Form 990
- Hospital Valuations
- HIT Security
- Endowment Funds; and more.

To help raise your bottom line and reduce stress, you need **Case Models in Healthcare Business** [A Practical Compendium for Physician Executives and Administrators].

Only \$ 99.00 USD
